

Documentary Time Take Two

At the moment we may not be able to explore the world and new places in the same way we normally can. BUT we can continue to learn about the world around us via documentaries about lots of different things.

We will be providing you with a number of different documentaries every few weeks to be having a look at to help keep broadening your mind and learning about the world around you.

Some of these are available for free, and others need subscriptions to different streaming sites.

Here's this week's selection. Let us know what you think of the documentaries, and have a go at answering the questions below once you have finished watching!
