

Community – Supporting Local

We are currently hearing loads about people raising money for the NHS and other national charities.

However, what about charities and organisations closer to home?

This week can you spend some time researching a local charity that you think could use people's support (both financially and by promoting the work that they do)

Can you then create a poster with the following information:

- Who are the organisation
- What they do to support people in your local community
- What they have been doing specifically during lockdown to support your local community
- What people can do to help out
- Why you think people should help them out
- Possible information about where people can make donations/ volunteer
- Contact information for this organisation

Can you then post this poster online/ print it and put it in your window or post it elsewhere in your community? (If you want posters printing – email them to us and we can print and post them to you!)

There are so many amazing organisations supporting our communities at the moment – hopefully we can do a tiny bit to help support them and raise awareness of the work they do. 😊
